INTERNATIONAL SYMPOSIUM ON PRODUCTION AND DECAY OF HEAVY FLAVORS[a]

Editors and Conference Chairmen
E. BLOOM and A. FRIDMAN

CONTENTS

Introduction. *By* E. BLOOM and A. FRIDMAN ix

Part I. Heavy Quark Search

Search for the Top Quark in $p\bar{p}$ Collisions (at $\sqrt{s}$ = 540 and 630 GeV) with the UA1 Detector at CERN. *Presented by* ISABELLE WINGERTER 1

Results on Light Neutrino Counting from the UA1 Collaboration. *Presented by* STEPHEN J. WIMPENNY 29

Search for Heavy Quarks in e^+e^-. *By* GAIL G. HANSON 35

Tagging of Heavy Flavors at Z^0 by Multidimensional Analysis. *By* CH. DE LA VAISSIÈRE and S. PALMA-LOPES 50

Search for New Heavy Quarks and Leptons by TOPAZ. *By* HIROAKI AIHARA .. 60

Top Quark Issues at the SLC and LEP. *By* B. F. L. WARD 70

Toponium Physics in e^+e^- Collisions. *By* FRANK C. PORTER 77

Part II. Quarkonia and Quark Fragmentation

Υ Physics with CUSB-II. *By* P. MICHAEL TUTS 85

Heavy Quarkonia. *By* KAY KÖNIGSMANN 98

The Physics of Heavy Quark Fragmentation. *By* R. J. CASHMORE 118

Heavy Quark Fragmentation Functions in e^+e^- Annihilation. *By* J. CHRIN 131

Probing the Hadronization Process Using Charm Correlations. *By* K. KINOSHITA 138

Part III. KM Matrices, Mixing, and CP Violation

Theory of Quark Mixing Matrix and Invariant Functions of Mass Matrices. *By* C. JARLSKOG 144

The KM Matrix (Experimental). *By* SHELDON STONE 158

[a]The papers in this volume were presented at the International Symposium on Production and Decay of Heavy Flavors, which was held at Stanford University, Stanford, California, on September 1–5, 1987. The symposium was sponsored by the Stanford Linear Accelerator Center (Stanford University) and the National Science Foundation. This conference also was one of a series, with the last one being held at Heidelberg (May 20–23, 1986) sponsored by the University of Heidelberg and the Deutsches Elektronen-Synchrotron Laboratory (DESY).

D^0–$\overline{D}^0$ Mixing: The Experimental Situation. *By* GARY GLADDING 178
$B\overline{B}$ Oscillations. *By* HENNING SCHRÖDER 190
Rare B Decays and CP Violation. *By* FREDERICK J. GILMAN 211
Experimental Possibilities for Observation of CP Violation in B Decay. *By* B. COX 224
Experiments on CP Violation in the $K^0\overline{K}^0$ System. *By* A. NAPPI 243
Tests of CP Symmetry with K^0 and $\overline{K}^0$ at LEAR. *Presented by* CLAUDIO SANTONI 267

Part IV. B Decays

Nonleptonic B Decays. *By* K. BERKELMAN 273
Observation of Charmless B Decays. *By* DAVID B. MACFARLANE 292
B Meson Physics with the Crystal Ball Detector. *By* TOMASZ SKWARNICKI 303
Observation of D^{*+} Polarization in Semileptonic B Decay. *By* GARY B. WORD .. 309
Measuring Lifetimes with TASSO at PETRA. *By* AVRAM MONTAG 313
Measurement of the B Hadron Lifetime from Mark II at PEP. *By* RENÉ A. ONG 320
Results from PETRA on the Average Lifetime of B Hadrons. *By* DAVID MULLER 325
On Charm and Beauty Decays: A Theorist's Perspective. *By* I. I. BIGI 333
Charmless B Decays to Baryons. *By* M. GRONAU 352
Measuring Electromagnetic Penguins through B Decays. *By* N. G. DESHPANDE and J. TRAMPETIC 358
Search for Axion Production in $\Upsilon(1S)$ Decays. *By* KENNETH H. FAIRFIELD 361
The Search for the Fourth Family of Quarks and Leptons. *By* DAVID B. CLINE 366

Part V. Charm Decay

Experimental Review of Nonleptonic Charm Decay. *By* M. S. WITHERELL 383
Measurement of the $D^0 \to K^-\pi^+$ Branching Fraction. *By* S. ABACHI, C. AKERLOF, P. BARINGER, D. BLOCKUS, B. BRABSON, J-M. BROM, B. G. BYLSMA, J. CHAPMAN, B. CORK, R. DEBONTE, M. DERRICK, D. ERREDE, C. JUNG, M. T. KEN, D. KOLTICK, P. KOOIJMAN, J. S. LOOS, E. H. LOW, R. L. MCILWAIN, D. I. MEYER, D. H. MILLER, B. MUSGRAVE, C. R. NG, D. NITZ, H. OGREN, L. E. PRICE, J. REPOND, D. R. RUST, E. I. SHIBATA, A. SNYDER, K. SUGANO, R. THUN, and R. TSCHIRHART 401
Indications for the Decays, $D_s^+ \to \eta\pi^+$ and $D_s^+ \to \eta'\pi^+$. *By* G. WORMSER 408
A New Measurement of D^* Branching Ratios. *By* CONSTANTINE SIMOPOULOS 413
Semileptonic Decays of D Mesons. *By* KRZYSZTOF SLIWA 419
Observation of $D_s^+ \to \eta\pi^+$ and a New Limit on $D^+ \to \mu^+\nu_\mu$ and f_D. *By* IAN E. STOCKDALE 427
Measurement of Charmed Particle Lifetimes from E-691. *Presented by* LUCIEN M. CREMALDI 433

Are There Bound Exotic Anticharmed Strange Baryons ($\bar{c}suud$ and $\bar{c}sudd$)? *By* HARRY J. LIPKIN 438

Part VI. Heavy Flavor Production

Hadroproduction and Photoproduction of c and b Hadrons. *By* BERNARD D'ALMAGNE 445

Charm Photoproduction and Lifetimes from the NA14/2 Experiment. *Presented by* ROBERT BARATE 467

Charm Production in Photon-Photon Collisions. *By* HANS P. PAAR 475

Hadronic Production of Charmed Particles: Recent Results from the NA32 Experiment. *By* M. BOSMAN 483

Hadronic Production of Charm: Results from FNAL E-400. *Presented by* M. DIESBURG 490

The Production of Heavy Flavored Baryons at ISR. *Presented by* G. D'ALI 496

Charm Production Measured in a 400-GeV Proton-Copper Beam Dump Experiment. *Presented by* F. BERGSMA 506

Part VII. Heavy Lepton Physics

The One-Charged Particle Decay Modes of the Tau. By MARTIN L. PERL 516

Crystal Ball Results on Tau Decays. By STEPHEN T. LOWE 527

An Improved Upper Limit of the ν_τ Mass from the Decay, $\tau^- \rightarrow \pi^-\pi^-\pi^-\pi^+\pi^+\nu_\tau$. *By* BERNHARD SPAAN 535

Leptons with Heavy Neutrinos. *By* LISA G. MATHIS 540

Part VIII. Current and New Physics

New Results from VENUS. *By* ITSUO NAKANO 544

First Results from AMY. *By* K. ABE 551

Status of CLEO II. *By* BRIAN K. HELTSLEY 558

Present Status of the Beijing Electron-Positron Collider (BEPC). *By* PING WANG 563

TRISTAN Accumulation Ring as a High Luminosity Collider. *By* E. KIKUTANI 567

Design Considerations of a Circular b Factory. *By* KLAUS WILLE 572

Status of the SLAC Linear Collider. *Presented by* TOM MATTISON 586

Linear Colliders as Beauty Factories. *By* UGO AMALDI 595

Part IX. Summary

Conference Summary. *By* CHRIS QUIGG 617
